React.js Features

- **JSX**: Merges HTML-like structures with JavaScript for intuitive UI code.

- **Virtual DOM**: Updates UI efficiently, enhancing app performance.

- **Component-Based**: Modular UI with encapsulated components.

- **Props & State**: Handles data passage and dynamic info.

- **One-Way Data Binding**: Controlled, unidirectional data flow.

- **Hooks**: Adds features without class components.

- **Context API**: Manages global data effortlessly.

- **Event Handling**: Built-in system for user interactions.

- **React Router**: Simplifies app navigation.

- **Performance**: Optimal app running with lifecycle methods.

- **Concurrent Mode**: Allows non-blocking tasks.

- **Developer Tools**: Provides insights & profiling.
